

PITCH WORKSHOP AND NETWORKING WITH PEAR VC

TUESDAY, MARCH 19 AT 5:30PM
TMEC 106

Join us to learn How (NOT) to Pitch Your Startup from Eddie Eltouky, biotech partner at Pear VC! We'll dissect and rebuild common mistakes from hundreds of pitches through memes, call out yellow flags, and demonstrate a pitch in both its flawed and elevated forms. We'll also give more information about how Pear can be a resource to technical founders -- and how to apply for our yearly Pear Competition, where founders can receive mentorship and funding for their early-stage startups or startup ideas. The workshop will be followed by a mixer. We'll have food, drinks, and snacks!

MORE ABOUT PEAR VC

Pear VC is a pre-seed and seed stage VC firm that partners with entrepreneurs from their earliest days to build category defining companies. We're proud to have backed top-tier teams across industries and verticals, such as those at DoorDash, Gusto, Branch, Aurora Solar, and Vanta. Within biotech, Pear has a strong and growing portfolio of companies including Guardant Health, BioAge Labs, Xilis, and Foresight Dx, among others, and we focus specifically on tech-enabled bio platforms across therapeutics, diagnostics, and life science tools/software.

PEAR COMPETITION

Pear Competition is looking for applications from biotech founders on campus! Winning teams will receive \$50k uncapped SAFE, and a fast-track partner meeting for PearX, Pear's entrepreneurial boot-camp for early-stage company founders that includes a \$250k-2M investment. There is a short application (should take ~60 mins) for Competition, and the deadline is April 3 for all biotech companies regardless of university.
